FUTURE SENSE

FIVE EXPLORATIONS OF WHOLE INTELLIGENCE FOR A WORLD THAT'S WAKING UP

Malcolm Parlett Ph.D.

***Future Sense* builds on something we all know: that the world is changing rapidly, there's unprecedented questioning and a mixture of both anxiety and excitement. Humanity can appear divided and incapable of meeting the global challenges.**

Future Sense proposes that human beings need their 'whole intelligence' to be regenerated and accessible. Based on Malcolm Parlett's experience as a psychological practitioner, the book offers explorations of five key dimensions of whole intelligence – our all-round capability to function effectively in the world. He shows how these have relevance both personally and collectively – in every human system; and that tackling global problems begins in the microcosm of our own lives. Our interconnectedness means that changes in the small worlds we inhabit have ripple effects far afield. Each of us – constructively or not – is co-creating humanity's future.

This is a book of big ideas, psychological insights, and pioneers a different form of grassroots activism.

"Parlett has a rare gift for ranging from the personal to the global and back again, weaving these dynamic elements together with insight, empathy, and panache."

Gordon Wheeler, President of the Esalen Institute, Big Sur, California

"A brilliant modern elaboration of the Aristotelian concept of Fronesis; that elusive ability, often translated as 'practical wisdom.'"

Tomas Björkman, Founder of the Ekskåret Foundation (Stockholm, Sweden) and author of *The Market Myth*

*"With his whole intelligence, Malcolm Parlett courageously makes sense of walking an alternative path to restore humanity. The wisdom in *Future Sense* is a crucial guide to our new steps. He nails it."*

Marcia Karp, psychotherapist, trainer and author; Lifetime Achievement Award in USA and UK for her pioneering work in psychodrama and group psychotherapy

MALCOLM PARLETT has worked as a psychological researcher, teacher, consultant, therapist, group leader, editor, and coach. He has held three visiting professorships, and is a leading thinker in the field of Gestalt studies. His interests include the environment, politics, and the intergenerational effects of war; also travel, grandparenting and friendship. He lives in Oxford.
